## ENVIRONMENT POLICY

---

Fortescue Metals Group respects the need to protect the environment in which we operate. We demonstrate a proud history of environmental engagement to minimise, mitigate and remediate the impacts of our operations.

As we continue to mature and grow our business, we strive to achieve effective and sustainable environmental outcomes through disciplined environmental management. In true Fortescue spirit, this includes innovative consideration of environmental management techniques in project development, operation and rehabilitation.

As responsible corporate citizens, compliance with all relevant environmental laws and obligations is the minimum standard to which we operate, and, the minimum requirement against which we measure our environmental performance.

Protecting the environment now and into the future is a cornerstone of Fortescue's success and sustainability. This success benefits not only our company, but also our families, our communities and our future generations.

Neville Power  
Chief Executive Officer
